About the Institute

Indian Institute of Information Technology (IIIT) Ranchi is an Institute of National Importance under the Act of Parliament of India established in 2016. The major objective was to set up a model of education which could produce best in class human resources in IT and harness the multidimensional facets of information technology in various domains. The Institute is currently offering B.Tech (Hons.) degree in Computer Science and Engineering (CSE) and Electronics and Communication Engineering (ECE) as well as B.Tech CSE with specialization in Data Science and Artificial Intelligence and B.Tech ECE with specialization in Embedded Systems and IoT. The institute also offers M.Tech in Data Science and Artificial Intelligence, and M.Tech in Embedded Systems and IoT, as well as Ph.D programs.

About the Conference

Mental health issues negatively impact millions of people's lives globally. Mental health is an important issue with many challenges in investigation, diagnosis, treatment, monitoring, drug of choice, and side effects. Public health is the science and art of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, public and private, communities, and individuals. Modern technologies like the Internet of Things (IoT), Artificial Intelligence (AI), Machine Learning (ML), and Deep Learning (DL), among others, could help to solve problems in the domains of mental health and public health.

GMHPHCI'2022 aims to bring together researchers, leading scientists, psychiatrists, psychologists, doctors, statisticians, and healthcare workers to share knowledge, present their novel ideas, and discuss the challenges and present novel solutions in the field of healthcare.
